

Disaster Recovery & Business Continuity

Are You Aware...?

Only 6% of companies suffering from catastrophic data loss survive, while 43% never reopen and 51% close within two years

Companies lose an average of \$84,000 for every hour of downtime. The cost of downtime is estimated at close to \$90,000 per hour

Man-made disasters affect 10% of small businesses

Natural disasters have impacted more than 30% of all small businesses in the USA

About 70% of all successful attacks on computer networks were carried out by employees and insiders

Do you know how to protect your company?

DATACENTER.BZ, located in Worthington, Ohio, provides server collocation space, as well as a platform for disaster recovery and business continuity solutions. Our clients are local, national, and global businesses that require a secure location for their mission-critical servers and storage arrays.

The facility is classified as a Tier IV datacenter, meeting all the redundancy requirements for this classification. DATACENTER.BZ is also carrier neutral, which allows our clients to connect to their carrier of choice.

Your business can take advantage of several applications at DATACENTER.BZ as part of a Disaster Recovery or Business Continuity solution:

- ⇒ Secure location for Storage Array Networks (SANs)
- ⇒ Primary location for servers, so in the event of a disaster your mission-critical equipment operates seamlessly because it's already off-site...you can now locate only back-up equipment at your facility
- ⇒ Secondary location for back-up servers, in the event you want to locate primary servers at your facility, or at a data center closer to your location

DATACENTER.BZ solves your problem of finding a safe, secure, reliable location for housing your servers and storage arrays. Where will **your** equipment be the next time disaster strikes?
